

Helping employers optimize strategy and performance for their health plans

As industry experts, we understand the burden employers are tasked with, balancing the ability to offer competitive, comprehensive benefits with the need to maintain financial stability. Sentinel Solutions Complete is designed to help our clients navigate the two major financial threats to their health plan: pharmacy (specialty drugs) and medical claims (gene therapy and dialysis). Integrating a cost-containment solution to address these issues reduces the cost burden on the healthcare system, including employer health plans.

Proprietary Solutions

Patient Assistance Program (PAP)

Stealth is proud to partner with Amwins Rx for Patient Assistance Program (PAP) solutions. PAP is a cost advantageous solution for employers who are ready to tackle the rising costs of prescription drugs.

This program places focus on drug(s) causing the most financial risk to the plan and reduces the possibility of disruption to improve the overall member experience.

Amwins Rx provides multiple options to meet clients where they are.

- PAP with RxBenefits, as well as through other PBMs
- Targeted and Supplemental approaches

Gene Therapy Solutions (GTS)

An innovative and sustainable solution that is as evolutionary as the gene therapy treatments themselves. We recognize that employers need more than a program; they need a partner. Amwins Gene Therapy Solutions (GTS) includes operational oversight, as well as ongoing market cost benefit analysis.

GTS offers reimbursement to group health plans and their coordinating stop loss carrier for qualified claims. Qualifying reimbursements extend from the first dollar of group health plan expense up to specified limits for each covered therapy.

Amwins is pleased to offer two approaches to address the rising cost of gene therapy treatments.

- GTS - 3 - GTS - 5

Program Advantages

Meaningful Protection: First-dollar protection is given to the plan sponsor

Portability: Change carriers without disrupting coverage terms

Industry Experts: Our experts monitor the landscape of FDA approvals and make purposeful additions that bring value and positive results to clients

Simplified Billing & Administration: Administrative burden is reduced by including the program fee in the stop-loss bill

Dialysis Management Services (DMS)

DMS saves clients an average of over 80% off of billed charges

Helping employers manage all aspects of outpatient dialysis claims. From improved member experience through early intervention & case management to proprietary methodologies, this program is strategically designed to reduce employer claim costs.

The DMS program is based on a few key components: our proprietary plan language, our Reasonable Value Payment re-pricing methodology, and our innovative Care Management approach.

DMS can customize their solution to meet your needs in partnership with your health plan. Reach out to learn more about our plan options.

How it Works

Set it and forget it.

Our team of industry experts handle all of the work on behalf of our clients. No more allocating valuable resources to ensure your program(s) run smoothly.

Data to drive decisions and impact.

Aggregate claims data can help identify possible red flags for disease diagnosis and/or complications and offer intervention strategies.

Industry Leading Subject Matter Experts.

Our team is constantly assessing and developing programs, diving into data and iterating based on results.

Now is the Time

As an **industry leader** with a **suite of meaningful solutions** that address a spectrum of needs, you can count on Stealth to monitor plan and market trends that help you **achieve financial security** for your health plan!
